Message of KECL Executive

Afghanistan is reconstructive and rehabilitatee country. Multi-national Companies, International NGO,s US and UN Agencies are focusing how to support, develop, reconstruct and provide a strong highly effective strategic path to Afghanistan. It is therefore need to play a positive role of every individual belongs to this country.

It is the time for Afghan nation to show much they are sensitive and sincere to Afghanistan and what potential abilities they have to survive.

Khan engineering company Ltd, proudly presents its qualitatively services and products for reconstruction and rehabilitation of Afghanistan. We look forward for opportunities to prove our self as a strong bridge between your endeavors and its completion and to be beside to your and international community as a whole organization.

Best Regards,

Haji Khan
President & Chief Executive

Message of KECL Vice Chief Executive

Khan Engineering Company has started its service repairing machinery parts and Manufacturing the deep well machineries at first. That was the time when the Kabul city and related arias were strongly in need fo drinking water and water to use for their essential live needs.

KECL supported that sector providing not only deep well digging machineries as well as personals services. Now we turned our self to the latest need of community which is heavy production as iron and steel casting. By this we can develop the industrial site of Afghanistan and provide it its own production.

it is also to support and train the people of Afghanistan and make them a professional and responsible citizen of Afghanistan.

With Regards,

Raz Muhammad
Vice President & Vice Chief Executive
